## **PROJECTS**

# 1. CHARTS- (Javascript)

- Area of Responsibility
  - implementation of the lightweight chart and Tradingview library in JavaScript.
  - implementation of the WebSocket for live data updates in Both the library.
  - solving production bugs.
  - deployment of the project in cloudberry.
  - implementation of the gulp in both projects, helps us to minify and uglify the code by which code is not directly readable to the third person on the client side, and it also enhances the load time.
  - Gzip compression of the files for performance enhancement.
  - Some UI changes in the project.

#### 2. DERIVATIVES- (React)

- Area of Responsibility
  - Integrate chart in F&O project.
  - Did order page module.
  - Did modify page module.
  - solving production bugs.
  - implementation of the gulp.
  - implement Gzip compression.

# 3. Plugin of 5paisa - (Javascript)

- · Area of Responsibility
  - Made a library for the plugin.
  - Made order page and modify page for a basket in javascript.
  - Made a demo small project for the same.
  - Made API for Plugin in NodeJS.

## • Purpose of the project-

this is for the third-party vendors, they can integrate this plugin by CDN link and use 5paisa to Buy and Sell the stocks. as some vendors don't have the facility of brokerage because of the SEBI regulations, so they can use brokerage firms like Zerodha, angle one, 5paisa, etc. for that
